PROFESSIONAL SUMMARY

Motivated computer science student focused on software engineering and skilled in developing innovative solutions. Led a winning project in a competitive hackathon, demonstrating strong problem-solving and collaboration abilities. Seeking an entry-level position to contribute to impactful projects and engage with diverse teams while pursuing ongoing professional development.

EDUCATION

B.Tech: CSE (AI & ML) | Inderprastha Engineering College Expected May 2027 (Ghaziabad, India)
Class XII (Science) | Greenfields Public School Completed Dec 2023 (New Delhi, India)

SKILLS

- **Programming Languages:** Python, C, C++, SQL, JavaScript, TypeScript
- **Core CS Concepts:** Data Structures & Algorithms, Problem-Solving, Critical Thinking
- **AI/ML & Data Science:** Machine Learning, Anomaly Detection (Isolation Forest), Generative AI, Model Training & Optimization, Prompt Refinement, Data Analysis
- **Tools & Web Frameworks:** React, Node.js, Express, FastAPI, tRPC, Drizzle ORM, Microsoft Office, Intelligent Automation Tools

WORK EXPERIENCE

- AI Intern | KVGAI Tech Limited** Jan 2026 – Apr 2026 (Remote)
- Executed comprehensive training, fine-tuning, and debugging of AI models (Opus, Claude, Anthropic-based systems) to ensure compatibility across various LLM architectures.
 - Assisted in AI development, model optimization, prompt refinement, and performance evaluation to enhance model accuracy, response latency, and pipeline robustness.

PROJECTS

- Sentinel AI — Real-Time DDoS Detection & Mitigation Platform** [\(Click here to view\)](#)
Technologies: Python, FastAPI, Scikit-Learn (Isolation Forest), React, tRPC, MySQL
- Developed a real-time DDoS detection and mitigation platform (SentinelFlow) integrating a FastAPI-based anomaly detection engine utilizing Isolation Forest machine learning models.
 - Built a full-stack dashboard featuring a React 19 frontend and an Express/tRPC backend, implementing automated alerting via integrations with ServiceNow, Jira, and PagerDuty.
- Lakshya AI Portfolio** [\(Click here to view\)](#)
Technologies: Next.js, React, Python, RAG, LLM Integration, API Streaming
- Building an AI-powered portfolio with a conversational personal AI twin that enables recruiters and visitors to explore my experience, projects, skills, and professional background through natural-language interaction.
 - Developed a custom knowledge system using Retrieval-Augmented Generation (RAG), prompt engineering, persona-aware response generation, and real-time streaming.

ACHIEVEMENT & LEADERSHIP

- Event Lead | Think AI Society**
- Organize technical workshops, guest sessions, and coordinate events; cultivate new partnerships while maintaining relationships with existing partners.
- Social Media Lead | Hacksphere Society**
- Collaborate with team members to develop campaigns and design social media assets aligned with organizational goals, promoting community engagement.
- Bid2Code Hackathon Winner | JECRC University** Led team to 1st place among 100+ national teams
Top 5 Team | Hackstreet Hackathon Meerut Institute of Technology
